

ATTENTION DIVORCED PARENTS OF MINOR CHILDREN:

Please be advised you will need to provide Family Psychiatry of The Woodlands (your provider) with a court recorded copy of your final divorce decree with cause number located on each page. This is to verify which parent has mental health/psychological rights to the minor child. A minor child will not be seen if we are not supplied with the divorce decree. If the mental health/psychological rights have been modified in a modification order, you will need to bring both copies to the minor child's appointment, original divorce decree and original modification order. Again, both orders must be filed with the court and have a cause number for verification purposes. (Attorney's initial court filing copies will not be accepted.)

If your child is adopted you will need to provide us a copy of court recorded adoption papers with cause number located on each page. This is to verify that the child is legally in your custody.

We understand that the above can be a burden. However it is in everyone's best interest that we follow the law in regards to which parents have mental health/psychological rights to the child.
